A new counterfeit silver dollar is out and so perfect in weight and ring as to deceive experts. Its only defect is the letter "d" in the motto, "In God We Trust," which is so slanted as to appear almost like an italic letter. The false coin is an Illinois production.
The Pinkerton detectives have succeeded in discovering and arresting the persons who robbed the Express train on the St. Louis and San Francisco R. R. last October. Fred Wittrock, a Chicago coal dealer, and Wm. Haight, together with several accomplices, are found to have committed the robbery. Jim Cummings was credited with the act until the arrest of the above named persons.
The printers' dollars—where are they? A dollar here, and a dollar there, scattered over numerous small towns all over the country, miles and miles apart—how shall they be gathered together? Come home, ye are wanted. Come here in single file, that the printer may send you forth again, to battle for him and vindicate his credit. Reader, are you sure you haven't a couple of the printer's dollars sticking about your clothes?—Ex.

A man cannot be a robber of a public treasury and be a Democrat, according to the Jacksonian acceptance of the term, and Jacksonian Democracy is a pretty good variety to tie to. When a public plunderer is found masquerading as a Democrat we want to see him punished. We want to see all the thieves and bootleggers driven out of the Democratic party, where they have no right to be. There are other and more congenial fields for them to forage in.—Cincinnati Sun.
The State of Kentucky has furnished the United States with two Presidents, Confederate States with one President, other states with no less than fifty Governors and Lieutenant-Governors. She has been represented in the Cabinet by one

Secretary of State, three Secretaries of War, six Postmaster Generals, and has also supported and supplied the Supreme Court of the United States with six distinguished sons. Four times has a Kentuckian been elected Speaker of the House of Representatives.—Flemingsburg Gazette.

What a grand and glorious thing it is to live in a close State. Before the last election a Kentuckian had but little show, now they can get most anything they want. Sam Walton worked a year to get a position where they have the most kind of fevers and did not succeed until after the November election. Then he said the position did not suit him, and that he didn't want it, and that he wanted another and better position, and he got it. Ex-Governor Leslie has been appointed Governor of Montana, and several other Kentuckians have received good positions. When Hayes was acting as President, Ohio got everything. New York had fared well under Arthur, but it now looks like Kentucky would lead New York. If things would continue this way awhile we might get the Presidency, but Republican papers are springing up all over the State to help swell the Democratic majority next August. Then we can quietly soliloquize to ourselves, "it might have been," had it not been for the new Republican newspapers.—Bracken Chronicle.

The postal law makes it a larceny to take a newspaper and refuse to pay for it. A newspaper in Illinois recently brought suit against forty-three men who would not pay their subscriptions, and obtained judgement in each for the full amount of the claim. Of these, twenty-eight men made affidavit that they owned no more property than the law allowed them, thus preventing attachments. Then they, under the decision of the Supreme Court, were arrested for petty larceny, and bound over in the sum of \$300 each. All but six gave bonds, while six went to jail.—Ex.

Since Mrs. Cleveland has returned home it has turned out that she went to New York to shop and buy dresses. The report is that the new dresses have been ordered without train, or dancing length, as the dressmakers say and, what is more startling yet, it is said that Mrs. Cleveland intends to give one or two dancing parties in the White House as soon as the official mourning for Arthur is over. Mrs. Cleveland is passionately fond of young folks society. She loves to dance, and enjoy all the debutantes. She is not much more than a debutante herself, because she went to Europe just after leaving school and came back to America to be married. She has had no chance to go into society, and she intends to do so this winter, and her friends think she is right. When the subject of dancing parties was broached to President he would not listen to it. Then Mrs. Cleveland got out some old books showing pictures of dancing in the Executive Mansion during former Presidents' terms, and finally she mentioned that a stately minuet or square dance would be no harm, and finally she carried her point with the President, as she always does. Naturally, there is much flutter in society over the rumor that there will be dancing parties at the White House, and many say they will not believe it until they receive invitations.—Baltimore American.

"Of in the still night, ere slumbers' chain could bind me," the entrance to dreamland was guarded by a Cerberus in the shape of piles, which made the night horrible. But that was before I found the remedy for it in Tablers Buckeye Pile Ointment which is a never failing cure for piles. So you need look no further for a remedy if you have piles.

Resolved, That the Chautauque Circle of Louisa tender their warmest sympathy to Mr. and Mrs. Lytleton in their hours of bereavement, and knowing that no words of ours can mitigate such grief as theirs, we can only commend them for consolation to the Good Father in whose bosom their beloved now sleeps.

Resolved, That these resolutions be spread on the record of the Circle, and that a copy be sent to Mr. and Mrs. Lytleton, and that they be published in the Big Sandy News.

G. W. WROTE, Pres.
MAGGIE HATCHER, Sec'y.

The news of the drowning of Tommy Lytleton was received by our community with much sorrow and regret. This sad accident occurred on Christmas night, about 11 o'clock, as Prof. Lytleton and family were getting on board the steamer Ingomar, on which they intended to go to Pikeville. The unfortunate child stepped between the wharf and steamer and was never seen again. Search for the body was begun at once. The next morning (Sunday) a thorough search was begun and was continued almost without cessation during the day. No services were held at the M. E. Church, South, as a large number of the people were aiding in some way in the search for the body. Considerable searching was done through the following week, but it was all in vain. Tommy was an exceedingly bright and intelligent little boy, of seven years of age.

The deepest sympathies and tenderest feelings of this entire community are with the family.

Big Sandy.

IS SUNDAY SCHOOL, JAN. 2ND, 1887.

Tommy Lytleton is dead. We grieve over his life's sad and sudden close. He was a faithful scholar in our school. His smart face, his bright eyes, gladdened our hearts every Sunday morning, oh, how we miss him. But we bow to Him, whose wisdom we would not question, whose love is stronger than ours.

We extend to the bereaved father, mother, little sisters, and brother and to his uncle, our earnest sympathy, while they mourn the sad death of their darling Tommy, without even the consolation of knowing where his body is.

May our pitying Saviour encompass these stricken ones in His arms of Love. May His Grace hold them up under this, their deepest sorrow, and enable them to say "Not as I will, but as Thou wilt."

Resolved, That this memorial be entered upon our records, a copy be sent to Prof. H. T. Lytleton and family, and also published in the Big Sandy News.

The is more catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years Doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires a constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure now on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly upon the blood and mucus surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circular and testimonials. Address F. J. —Keep up the boiling for one hour, when the egg will be, when broken, light, mealy and a most digestible article of diet.—*American Dairyman*.

—Doughnuts: One cup sour milk, one egg, one cup of sugar, one teaspoonful of salt, two-thirds teaspoonful of cinnamon, one tablespoonful of saleratus, and flour to roll. Roll thin, cut in rings and fry in very hot lard.—*Boston Bulletin*.

—To prevent ivory knife-handles from being cracked, never let knife-blades stand in hot water as is sometimes done to make them wash easily. The heat expands the steel which runs into the handle a very little and this cracks the ivory. Knife-handles should never lie in water. A handsome knife, or one used for cooking, is easily spoiled in this way.—*Albany Journal*.

—In common with clay, calcareous earth possesses the power of making sandy soils more close and firm, and, in common with sand, the power of making clay soils lighter, or more open and mellow. When sand and clay thus alter the texture of soils, their operation is altogether mechanical; but calcareous earth must exert chemical action in producing such effects, as its power is far greater than that of either sand or clay.—*N. Y. Herald*.

—A simple "layer cake" is made as follows: Mix one cup of sugar with outter the size of an egg, one cup of milk, one well beaten egg and enough flour to make a rather stiff batter, sifting one heaping teaspoonful of baking powder with the flour. Bake in three layer cake pans. For the filling mix one cup of sugar with the juice and grated rind of a lemon, three teaspoonfuls of corn starch mixed with a little water and a cup of hot water. Boil until thick and spread on the cakes.—*Boston Post*.

—In preparing fowls for the show room," says the *Poultry Monthly*, "give diet of barley and buckwheat daily for the morning feed, vegetables and rice, or corn-meal boiled in milk for the mid-day meal, and a full ration of fine wheat and sound corn late in the evening. To this diet may be added during the day, a handful of sunflower seed and hemp seed, which will prove highly advantageous toward heightening the color of comb and wattles, and giving a rich gloss to the plumage."

—Flour Pudding: One quart of sweet milk; wet and stir smoothly into a little of this cold milk six tablespoonfuls of flour. When the remainder of the milk boils, stir in this wet flour, boil ten minutes more and set away to cool. Then add, the well-beaten yolks of six eggs, then the whites, which have been beaten to a foam that will pile up; pour beat this into the cold pudding until it all looks even and light. Bake another half-hour and serve hot with the sauce mentioned above. This sauce is excellent on plain boiled rice, plain bread or Indian puddings.—*The Caterer*.

HOW TO JUDGE SHEEP.

Some of the Principal Points Giving Evidence of Good Qualities.

Purity of blood is invaluable, especially in the male sheep, as he is chiefly relied on when crossing or improving the breed is desired. The English downs are considered the best for producing first-class mutton, while the erinoces are remembered for producing the finest wool. The principal points sought for in sheep are those that give evidence of their fattening properties; a straight back, broad loins, roundness of body are valuable points. A good ram animal is one with plenty of skin, evenly put on, and as little bone as possible. The following gives requirements for mutton sheep: Head moderately fine; nostrils wide; eyes prominent; ears broad, moderately long, and covered with short hair; collar from breast and shoulders, tapering gradually all the way to where the neck and head join; neck short, thick and strong and free from coarse and loose skin; shoulders broad and full, and at the same time join so gradually the collar forward and the chine backward as not to leave the least hollow either place; fore legs, the mutton on the arm or fore-thigh should come quite to the knee; leg with heavy bone and tight, clear from superfluous skin, must stand out square and well apart; chest broad and well forward, keep the legs wide apart; girth or chest, deep and deep; fore flank quite full, not lying hollow behind shoulder; back loin, broad, flat and straight, from which the ribs must spring with a fine regular arch. Belly, straight on under ribs; quarters, long and full, with much quite down to the hock; hock should stand neither in nor out, but straight; joint or junction inside the thighs, deep, close and full, with a broad breast, with the legs open and upright; the whole body should be covered with wool, of a close texture, of good length and quality.—*Practical Farmer*.

Cooking Food for Cattle.

Prof. Wallace has been urging the use of cooked food for cattle. He states the experience of a feeder in the western countries who adopted the system of soaking the fodder with hot water. The dry fodder, which may be straw, barley or oat straw, is chaffed and laid out in a heap on a good level, and the concentrated food mixed with it. Hot water is then thrown over the pile until the water begins to ooze out at the base. The gentleman referred to used wheat and barley straw, 108 fat bullocks and 36 young cattle, about fifteen weeks on an average. Labor was not much increased, and boiling of the necessary water took about 2½ hundred weight of coal per week. His report is that he never animals do so uniformly well.—*London (Eng.) Life in the Paris Sewers.

It is possible, for a short time to the robust, but the majority of redned persons would prefer immediate death to existence in their noxious atmosphere. How much more revolting to be in one's self a living sewer. But this is actually the case with those in whom the inactivity of the liver deprives the refuse matter of the body to escape through the lungs, breath, the pores, kidneys and bladder. It is astonishing that life remains in such a dwelling. Dr. Pierce's "Golden Medical Discovery" they have used purely to the system and renews the whole being.
